(1). Pilotage fee is a composite fee and shall include one inward and one outward movement with services of ports' pilot(s), with required number of tugs/ launches of adequate capacity, mooring crew and shifting(s) of vessels for 'port convenience'. Shifting at the request of vessel will attract separate shifting charges.

(2). No charges shall be levied for shifting of a vessel for port convenience.

(i). "Port convenience" is defined to mean the following:

(a). If a working cargo vessel at berth or /mooring is shifted / un-berthed for undertaking hydrographic survey work or for allotting a berth for the dredger or for attending to repairs to berths, maintenance and such other similar works whereby shifting is necessitated, such shifting shall be considered as “shifting for Port convenience”. The shifting made to reposition such shifted vessel is also considered as “shifting for Port convenience”.

(b). If any vessel is shifted to accommodate any other vessel for the convenience of port operations shall be treated “shifting for Port convenience”.

(c). Whenever a vessel is shifted to accommodate another vessel which can not be berthed at other berths due to draft and LOA restrictions vessel is considered as “shifting for Port convenience”.

(d). Whenever a vessel is shifted to accommodate another vessel carrying hazardous cargo which needs adjacent berth to be kept vacant for safety reasons is also considered as “shifting for Port convenience”.

(e). Whenever a vessel is shifted to accommodate another vessel having priority at the adjacent berth and unless that vessel shifts, another vessel cannot be berthed at the adjacent berth due to length restrictions such shifting is also considered as “shifting for Port convenience”.

(f). Whenever a Vessel is shifted to/from anchorage due to tidal restrictions, cyclone, flood or any other natural calamities, it will be considered as “shifting for Port convenience”.

(g). Whenever a vessel is shifted from berth to accommodate another vessel on ousting priority, the vessel shifted is exempted from the payment of shifting charges since the same is paid by the vessel enjoying the ousting priority.

(h). The benefit of Port Convenience will not be applicable in the following cases:

(i). Non-cargo vessel which in any case have to vacate the berth when cargo vessels arrive.

(ii). Vessels using the berth exclusively for overside loading/ discharge.

(ii). Separate consolidated charges are prescribed for a particular vessel category and note therein states that it includes pilotage fee.

(4). Where a movement of vessel is aborted or had to be changed due to reasons like Tug failure, insufficiency of length, insufficiency of depth, lack of proper fenders etc., for which the vessel is not at fault, no charge shall be levied for the unsuccessful operations involved till she occupies allotted berth/ mooring.

(5). If the status of the vessel is changed during its stay in the Port, from foreign run to coastal run or vice versa, then the consolidated pilotage should be divided into two equal halves (i.e., one for inward and the other for outward pilotage) which should be charged according to the status of the vessel prevailing at the time of taking place of relevant movement.

(6). In case the vessel, after discharging cargo(es) shifts to anchorage for want of a suitable berth for continuation of unloading or if a vessel after loading cargo(es), shifts to anchorage for want of a suitable berth for continuation of loading then these movements shall be treated as 'shifting' and shifting charges shall be levied except when shifting is done for Port Convenience.

(7). For vessels on cold move during pilotage operations, cold move charges will be applicable as prescribed in **Schedule 2.2.4.**

(8). In the event of the vessel carrying a Pilot outside the Port limits for unavoidable reasons, the Master shall be bound to leave the pilot at the next nearest port and Master, Owner or his representatives shall be responsible for the repatriation and all connected formalities thereof and also be liable to pay all expenses incurred in the matter of boarding, lodging, other reasonable expenses and repatriation of the Pilot thus over carried. In addition, compensation at the rate of ₹111.19 for coastal vessel or US$ 4.16 for foreign going vessels per hour shall be payable by the Master of the vessel till the Pilot reports back to duty at the port.

(g). A coastal vessel shall be liable to pay port charges on coastal rates notwithstanding whether it was berthed on priority or otherwise.

(h). Ports should explore the possibilities of earmarking exclusive berth, storage areas and gates for coastal cargo outside the custom bonded area of the Ports to further facilitate movement of coastal cargoes.

(i). Major Port shall clearly work out the time limit within which a coastal vessel would be berthed in a particular port. This time limit may differ depending on the cargo and berth. Each Major Port should carry out a detailed exercise and issue a trade notice clearly indicating the upper time limit within which a coastal vessel would be given a berth in the port. As regards priority berthing through a specific window to coastal container vessels, Major Ports should have a detailed discussion with the PPP operator and publish the specific window for coastal container vessels. The above mentioned exercise and publication should be completed within 30 days from the date of issue of these guidelines.

2.3.5. Norms for cargo handling and penalty for non-achievement of performance norms/ incentive for achievement of performance norms.

2.3.5.1. Performance Norms (PPP basis)

Sl. No	Cargo	Performance norms per ship day in MT (For containers in moves per hrs.)
1.	**Dry Bulk Cargo**:	**
2.	**Liquid:**	**

3.	**Break Bulk Cargo:**	**
4.	**Container**	**
5.	**Other cargo not specified above.**	**

**** as per berthing policy notified from time to time.**

2.3.5.2. Penalty for non-achievement/ incentive for achievement of the prescribed performance norms *

Sr. No.	Particulars	Unit	Penalty / Incentive
1	If the ship stays upto 5% (higher or lower) of the stipulated time for that commodity as specified in productivity norms.		**
2	Berth stay is more than 5% beyond the stipulated time for that commodity as specified in productivity norms.	per hour or part thereof for every additional hour beyond 5%.	Penalty **
3	Berth stay is 5% lower than the stipulated time for that commodity as specified in productivity norms.	per hour or part thereof for every hour of saving in berth time beyond 5%	Incentive **

**** as per berthing policy notified from time to time.**

Notes:

(1). The penalty provisions will be levied on Stevedores/ Shore handling agents as applicable, with the provision that the amount can be claimed by the Stevedores/Shore handling agents from the cargo interests (Importer/ Exporter) or vessel owners through their agents, depending on the reasons thereof. Same way, incentive will be paid to Stevedores/ Shore handling agents as applicable. In the case of liquid cargo, the penal berth hire charges / incentive will be levied on the importer/ exporter/vessel agent.

(2). <u>Calculation of stipulated time of vessel w.r.t. performance norms of commodity</u>:

The stipulated time of stay of vessel shall be calculated based on the total cargo discharged/ loaded from the vessel during the stay at berth and the performance norm prescribed for the commodity.
[For example, a vessel carrying 59,830 tonnes of coking coal, the stipulated time of stay of vessel will be 103 hours i.e. 59830 tonnes ÷ 14000 tonnes per day x 24 hours = 102.56 hrs = 103 hours.]

For vessel handling multiple cargo, the said stipulated time of stay of vessel needs to be calculated w.r.t. performance norms prescribed for each of the cargo and aggregated for comparison with actual stay of vessel.

(3). The period for which the vessel operation is affected due to the following limited port-related or weather- related issues will be deducted from the actual time of stay of vessel at berth for arriving the incentive/ penalty for handling Dry and Break Bulk cargo at conventional berths:

(a). Break down/ non-availability of cranes to be provided by Port at berth.
(b). Rain and inclement weather as indicated in the Statement of Facts (SOF)
(c). Shifting of ships between berths on account of port. Port is required to maintain a record of a historical data of the frequency of such cases.
(d). Any delays in sailing post vessel readiness to sail on account of Port. i.e. Pilot/ tug unavailability, and tidal conditions.
(e). Draft surveys within the prescribed norms for ships. As a guideline, maximum 30 mins per party for interim draft survey should be allowed.
(f). The time lost due to stoppage of work for any reasons other than the above (a). to (e). to be excluded for calculation of performance norms, only with the approval of the Board.

(4). Where the vessel is not achieving the prescribed productivity norms, port reserve the right to shift the vessel to anchorage at the risk and cost of the ship in addition to levy of penalty charges, if any, at the above prescribed rate.

(5). Port may review the productivity norms on quarterly basis and revise the same, if required, based on local conditions and past performance etc. as stipulated in the Berthing Policy for Dry Bulk Cargo for Major Ports, 2016, issued by Ministry.

(6). While calculating the performance of the vessel, factors beyond the control of the cargo handler like cyclone, heavy rain, labour unrest, etc. will be treated as “dies-non”
